

Summary

Fresh Electrical Engineering graduate with a strong interest in Electrical Instrumentation (E&I) Design Engineering within the Oil&Gas industry, particularly in the Gulf region. Passionate about instrumentation systems, process control, industrial automation, and electrical design. Seeking an opportunity to apply technical knowledge, develop practical engineering skills, and contribute to project excellence through dedication, teamwork, and continuous learning in international industrial environments.

Professional Experience

Pak Elektron Limited (PEL)

July 2024 – Sep 2024

Electrical Engineering Intern, Transformer & Switchgear Department

- Worked across Transformer and Switchgear functions, supporting engineers with hands-on tasks in both areas: transformer fundamentals and manufacturing processes, and switchgear/panel component handling, layout, and protection coordination checks.
- Gained practical exposure to how transformer ratings interface with switchgear protection settings, and to LV/MV panel requirements in an industrial manufacturing environment.

IESCO 132 kV Grid Station, Jhelum

June 2025 – July 2025

Electrical Engineering Intern

- Assisted in monitoring/operation of 132 kV transformers, circuit breakers, isolators, and protection panels; supported inspections, preventive maintenance, fault diagnosis, and restoration activities.
- Gained exposure to relay coordination, protection schemes, and control room operations, following electrical safety standards and grid station procedures.

Elevvo Pathway (Egypt) — Remote Internship

July 2025 – Aug 2025

Machine Learning Engineer Intern

- Built and trained ML models using Python (NumPy, Pandas, Scikit-Learn) for prediction/classification tasks; performed data cleaning, feature engineering, EDA, and hyperparameter tuning; prepared technical documentation.

Academic Experience

Piezoelectric-Based Smart Helmet (Final Year Project)

Oct 2025 – May 2026

- Designed a smart helmet using piezoelectric sensors to harvest energy from vibrations/impacts, with microcontroller-based circuitry for signal processing and automatic alert generation, improving real-time worker safety monitoring.

Education

Bachelor of Electrical Engineering

Lahore, Pakistan

University of Engineering & Technology (UET), Lahore

Dec 2022 – June 2026

- CGPA: 3.2/4.00 — Course Work: Power Electronics, Control Systems, Power System Analysis & Design, Power System Operation & Control, Smart Grid — Thesis: Piezoelectric-Based Smart Helmet

Research & Publications

Performance Optimization and Stability Analysis of a DC–DC Boost Converter Using Classical PID Control Schemes

- Conducted performance optimization and stability analysis of a DC–DC Boost Converter using Classical PID control; investigated transient/steady-state response and controller tuning. Accepted for publication, in process of appearing on IEEE Xplore.

Extracurricular & Volunteer Experience

IEEE UET Lahore Student Branch – Managing Director

Apr 2025 – May 2026

- Led teams and coordinated projects, strengthening leadership, communication, and collaboration skills.

Blood Donor Society (BDS), UET – Mentor

May 2025 – May 2026

- Guided and managed an organization of 500+ members, coordinating events and enhancing leadership skills.

Additional

Technical Skills: Microsoft Office, MATLAB, Simulink, ETAP, HFSS, AutoCAD Electrical, Multisim, Proteus, VS Code, Google Colab, Python, PyCharm, Dev C++, Machine Learning, Deep Learning, AI.

Non-Technical Skills: Leadership, Time Management, Team Collaboration, Problem Solving, Effective Communication, Decision Making.

Interests: Innovative Projects, Team Leadership, Research Work, On-Site Engineering, Sports, Literature.
